wax to stick to.

The environmentally friendly packaging can be easily disposed of at any of your local recycling facility.

APPLICATION

* Please treat only small areas at once if you are new to waxing.

-Use the mini brow applicator and wax in small sections for precise results.

-Use Vaseline or coconut oil as a protective barrier over any brow hair you don't want the

-Note the hair growth pattern before you begin. You may need to wax in several sections if

-Start waxing from the outside edges of the hairline, where your hair is thinnest and less

-Hold your skin taut while removing wax, especially in sensitive areas prone to bruising.

-Applying against hair growth may be necessary to completely pick up all the hair.

-Sit on the floor or on your bed with a towel under you, with the soles of your feet

-Take note of the way your hair grows. Work in small manageable sections.

INTRODUCTION

Congratulations on the purchase of Blitzwax Waxing Kit. You have selected a high-quality product. Please familiarize yourself with all operating and safety instructions BEFORE using this appliance.

INTENDED USE

This appliance has been designed exclusively for hair removal of legs, armpits and the bikini zone on the human body. The warmer is suitable for use for all wax types (including canned wax). It is intended solely for use in private households.

tub, shower or other vessels filled

CAUTION – To reduce the risk of fire, burns, electric shock or any

1. This appliance can be used by children aged from 8 years and above and persons with

reduced physical, sensory or reasoning capabilities, or lack of experience and knowledge,

provided that they are under supervision or have been told by a responsible person regarding

2. Always test before use: apply hot wax on a small area of the skin for warmth and possible

5. Use this appliance only for its intended use. The use of attachments not recommended by

7. Close supervision is necessary when this appliance is used near children or invalids.

10. Keep the cord away from hot or heated surfaces. Do not wrap the cord around the

8. Unplug from outlet when not in use. Allow cooling before handling, cleaning or storing

9. Never operate this appliance if it has a damaged cord or plug, if it is not working properly,

11. Do not drape the cord over a counter or a tabletop in such a manner that it can be pulled

use of the appliance in a safe way and understand the potential risks involved.

4. Do not leave the appliance unattended while it is being operated or plugged in.

if it has been dropped or damaged in any manner or dropped into water.

NEVER use this appliance near a bath

This product has been tested to comply with EMC Directive (2014/30/EU), LVD Directive (2014/35/EU), and FCC standards.

* During the first few minutes of initial use, you may notice a slight odor. This is normal and

will quickly disappear.

BLITZWAX WARNING: ▲ Please note that hair removal (of any kind!) can cause trauma to the skin, and

- normal skin reactions may occur such as redness, swelling, tenderness, etc.
- ▶ Before waxing, do a 24-hour patch test to see how skin reacts. ▶ Beware of burns. Wax can reach high temperature and cause burn injuries!
- ▶ Do not wax the area with redness, inflammation, swelling, open wounds, burns, eczema

▶ Please consult with your doctor before use if you are susceptible to allergic reactions or have any health concerns.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety precautions should always be followed including: READ ALL INSTRUCTIONS BEFORE USING.

DANGER – To reduce the risk of ELECTROCUTION:

- 1. Always unplug this appliance immediately after using it.
- 2. Connect this appliance to a properly grounded outlet only.
- 3. Do not use while bathing or showering.
- 4. Do not place or store appliance where it may fall or be pulled into a tub or sink. 5. Do not immerse the appliance in water or other liquids!
- 6. NEVER reach in to get an appliance that has fallen into water. Make sure you don't stand in water and unplug immediately with electrically insulated gloves.

OUICK-START GUIDE

1. READY

Hair should be 1/4 inch long to wax effectively. Your skin should be clean and dry. 2. SET

Put wax into the wax warmer and allow the beads to melt until it's

the consistency of honey. 3. TEST

Test a small amount of melted wax on the inside of your wrist to

make sure that it's not too hot. 4. APPLY Using the applicator, apply the wax in the direction of hair growth.

Work in small manageable sections.

5. COOL Wait for 30-45 seconds and allow the wax to harden. It's ready to

remove as soon as it's no longer sticky to the touch. 6. PULL

Hold skin taut. Flick the edge of the wax-up and pull quickly in the opposite direction of hair growth.

USER INSTRUCTIONS

HOW TO USE BLITZWAX WAX WARMER

- 1. Fill the removable pot with 3.5-11 oz wax beads. 2. Place the pot into the designated insert within the warmer.
- 3. To melt wax quickly, place the lid on and turn the dial clockwise to max heat.
- 4. After the wax is melted into a liquid consistency, adjust to your desired temperature

You'll see the indicator light turn from red to off when the desired temperature is reached. * The temperature will remain constant, meaning the warmer will automatically turn on to heat wax when it drops below the desired temperature.

TROUBLESHOOTING Q+A

Why didn't the wax remove all my hair?

- -The hair was too short. The ideal length for wax to grip and remove hair from root is 0.25inch-0.75inch (0.6cm-2cm).
- -The wax was too cool. Heat the wax until it's the consistency of honey. -Sometimes hair grows in multiple directions. Try a second application while applying the
- wax in an alternate direction. -If hair remains after 2-3 passes, it's best to clean up with tweezers. -Apply more pressure with the applicator. Firm pressure ensures each hair is shrink-wrapped

with wax. Why is wax residue left on my skin?

- -The wax was applied too thin. Use a little more. Apply it about a nickel thick.
- -The wax was applied unevenly. With practice you will avoid this issue. -Use the AFTER-Wax treatment oil to remove any residue.

How long should my hair growth be?

We advise waiting until your hair is at least 1/4 inch in length (around the size of a grain of rice). If your hair is too short, there won't be enough length for the wax to grip it, and your results won't be successful.

Are there any concerns I should be aware of? -Avoid applying wax to moles, warts, mucous tissue, sunburned or irritated skin.

-Do not wax after plastic surgery or a chemical peel until approved by a physician. -Avoid sun and hot water for 8 hours after use.

-Do not use wax if you're taking Retin-A or Accutane.

Do I need cloth strips? Nope. No cloth strips are needed with hard wax.

Is that normal If the wax warmer auto turns on and off?

This wax warmer has AUTOMATIC POWER OFF FUNCTION -- When wax warmer in a hot temperature, indicator light will turn down automatically and turn on when temperature

HOW TO USE BLITZWAX WAX BEANS

To perform an effective result, it's recommended that you follow the instructions below:

- 1. Allow the wax to melt completely. We recommend a temp between 150-180°F.
- 2. The best indication that your wax is the right applicable temperature is when it resembles the consistency of thick honey. 3. Always use with caution. It's important to test a small amount of melted wax on the inside
- of your wrist before application. 4. Make sure your skin is completely dry before waxing. Apply some baby powder to soak
- up any excess moisture if necessary. 5. Using the applicator, apply wax in direction of hair growth. Use firm pressure to ensure each hair is shrink-wrapped with wax.
- 6. Wait 30-45 seconds and allow the wax to harden.
- 7. It's ready to be removed as soon as it's no longer sticky to the touch. Hold skin taut. Flick the edge of the wax up and pull quickly AGAINST direction of hair growth. 8. Repeat over different sections until the desired area is soft, silky hair-free.

READ ALL INSTRUCTIONS BEFORE USING. EASY CLEANUP OF WAX POT

warmer cleaning solution or a small amount of oil.

Note: You don't need to clean the wax pot after each use! The left-over wax can be melted and reused for application next time To clean your pot, please ensure that the appliance is unplugged but still warm. Use cotton muslin strips or paper towels to wipe clean. You can also use a wax

To achieve a more effective hair removal result, we strongly recommend you

- ► Apply wax in direction with hair growth and remove in opposite.
- ► Hydrate and exfoliate a day or two prior to waxing.
- ► On the day of waxing, avoid using any lotions or creams.
- ▶ When removing, pull the wax parallel and close to your waxed skin. ► Avoid undue sun exposure for 24-48 hours.
- ► Exfoliate after at least 24 hours to help prevent ingrown hairs.
