WyreStorm SW-130-TX-Ux Base Extender with Earc

Product Information

Specifications

Model: EX3-100-EARC

• Transmission Distance: 100m

Resolution: 4K at 60HzColor Sampling: 4:4:4Technology: HDBaseT 3.0

• Features: eARC support

Product Usage Instructions

Installation

Before starting the installation process, ensure you have all components from the box including the transmitter, power supply, cables, mounting ears, connectors, and the quickstart guide.

Wiring and Connections

It is recommended to run and terminate all wiring before making connections. Refer to the provided diagram for proper wiring setup.

Transmitter Setup

- 1. Connect the power supply to the transmitter.
- 2. Connect the HDMI input source to the HDMI Input port.
- 3. Connect the HDBaseT Output to the receiver's HDBaseT Input using an RJ-45 cable.
- 4. Connect any additional audio or control devices as needed.
- 5. Power on the transmitter.

Receiver Setup

- 1. Connect the power supply to the receiver.
- 2. Connect the display device to the HDMI Output port.
- 3. Connect the HDBaseT Input to the transmitter's HDBaseT Output using an RJ-45 cable.
- 4. Connect any additional audio or control devices as needed.
- 5. Power on the receiver.

Frequently Asked Questions (FAQ)

Q: What is eARC?

A: Enhanced Audio Return Channel (eARC) allows for high-quality audio transmission between compatible devices over an HDMI connection.

Q: How far can this extender transmit signals?

A: The extender can transmit signals up to a distance of 100 meters.

100m 4K 60 4:4:4 HDBaseT 3.0 Extender with eARC EX3-100-EARC

WyreStorm recommends reading through this document in its entirety to become familiar with the product's features prior to starting the installation process.

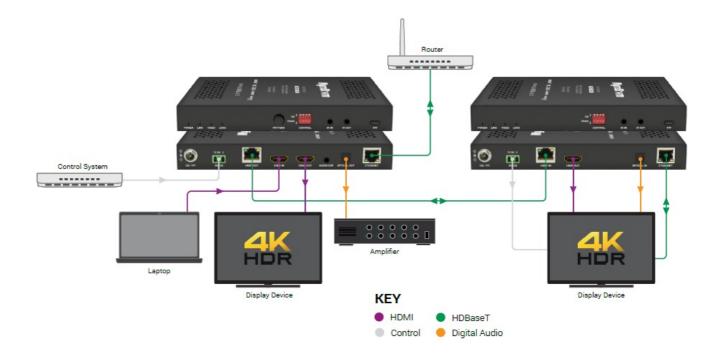

IMPORTANT! Installation Requirements

- Visit the product page to download the latest firmware, document version, additional documentation, and configuration tools.
- Read through the Wiring and Connections section for important wiring guidelines before creating or choosing pre-made cables.
- While this product supports CEC, WyreStorm cannot guarantee compatibility with all forms of CEC communication.

In the Box

- 1x EX3-100-EARC
- 1x 12V Power Supply (US/UK/EU/AU)
- 1x IR Receiver Cable
- 1x IR Emitter Cable
- · 4x Mounting Ears with screws
- 2x 3-pin Phoenix Connector
- 1x Quickstart Guide (This Document)

Basic Wiring Diagram

EX3-100-EARC Transmitter (Front)

B	Link LED On: Indicates link with receiving device Off: No link with receiver/powered off		
G	Video LED	Green: Source video is being transmitted Red: Pattern is being transmitted with HDCP BLUE: Pattern is being transmitted without HDCP OFF: No video is transmitted	
D	eARC LED	ON: EARC Audio is transmitted OFP: No eARC audio is transmitted	
3	Pattern Select	Press to manually change pattern	
G	SET Dip Switches	Adjust RS-232 Function	
G	IR IN/OUT	3.5mm jack: Bidirectional IR	
0	Firmware Update	USB-C for firmware updates	

EX3-100-EARC Transmitter (Rear)

A Power Input	12V 6A Screw Down Jack
B RS-232	3-pin Phoenix: Passthrough Serial Input
C HDBT Output	8-pin RJ-45 female Connect the transmitter's HDBT OUT to receiver's HDBT IN.
D HDMI Input	19-pin type A HDMI female Supports HDMI and DVI/D with adapter
E HDMI Output	19-pin type A HDMI female Supports HDMI and DVI/D with adapter
Audio Output	3.5mm jack: 2ch analog audio input
G Optical Output	Supports up to 5.1ch when used as passthrough. 2ch when used for audio de- embed
H Ethernet	Passthrough ethernet connection

A	Power LED	Solid: The unit is powered On Off: The unit is powered Off
B	Link LED	On: Indicates link with receiving device Off: No link with receiver/powered off
G	Video LED	Green: Source video is being transmitted Red: Pattern is being transmitted with HDCP BLUE: Pattern is being transmitted without HDCP OFF: No video is transmitted
D	eARC LED	ON: EARC Audio is transmitted OFF: No eARC audio is transmitted
•	SET Dip Switches	Adjust RS-232 Function
G	IR IN/OUT	3.5mm jack: Bidirectional IR
G	Firmware Update	USB-C for firmware updates

A	Power Input	12V 6A Screw Down Jack
B	RS-232	3-pin Phoenix: Passthrough Serial Input
G	HDBT Input	8-pin RJ-45 female Connect the receiver's HDBT IN to transmitter's HDBT OUT.
D	HDMI Output	19-pin type A HDMI female Supports HDMI and DVI/D with adapter
3	Optical Input	Supports up to 5.1ch
G	Ethernet	Passthrough ethernet connection

Wiring and Connections

WyreStorm recommends that all wiring for the installation is run and terminated prior to making connections to the switcher. Read through this section in it's entirety before running or terminating the wires to ensure proper operation and to avoid damaging equipment.

IMPORTANT! Wiring Guidelines

- The use of patch panels, wall plates, cable extenders, kinks in cables, and electrical or environmental interference will have an adverse effect on signal transmission which may limit performance. Steps should be taken to minimize or remove these factors completely during installation for best results.
- WyreStorm recommends using pre-terminated HDMI and USB cables due to the complexity of these connector types. Using pre-terminated cables will ensure that these connections are accurate and will not interfere with the performance of the product.

RS-232 Wiring

The EX3-100-EARC uses a 3-pin RS-232 with no hardware flow control. Most control systems and computers are DTE where pin 2 is RX, this can vary from device to device. Refer to the documentation for the connected device for pin functionally to ensure that the correct connections can be made.

WyreStorm Connector			3rd Party Device
Pin 1	TX (Transmit)	> To>	RX (Receive)
Pin 2	RX (Receive)	> To>	TX (Transmit)
Pin 3	G (Ground)	> To>	G (Ground)

Dipswitch Settings

The dipswitches on the TX and RX allow for changing the audio transmitting mode. Use the table to the right to configure the extender's audio mode based on the application's requirement.

When setting a dipswitch setting, power off both the transmitter and receiver before making a change. Once set, the units can be powered back on.

Note: When DIP is switched to Optical De-embed, extender will automatically filter EDID and only support PCM

Functions	Setting
eARC/ARC	1 2 3 4
Optical Audio Return	1 2 3 4 10N
Optical Audio De-embed	1 2 3 4 10N
FW Update Valens	1 2 3 4
FW Update - MCU	1 2 3 4
High Bandwidth Mode	1 2 3 4
Low Bandwidth Mode	1 2 3 4 10N

Troubleshooting

No or Poor Quality Picture (snow or noisy image

- Verify that power is being supplied to the transmitter and receiving device.
- Verify that all HDMI and HDBaseT connections are not loose and are functioning properly.
- Verify that the HDBaseT cable is properly terminated following EIA568B standard.
- Verify that the output resolution of the source and display is supported by this extender.
- If transmitting 4K, verify that the HDMI cables used are 4K rated.

No or Intermittent 3rd party Device Control

• Verify that the RS-232 cables are properly terminated following the Wiring and Connections section.

Troubleshooting Tips

• WyreStorm recommends using a cable tester or connecting the cable to other devices to verify functionality.
