WZUICOV B0CBSHN3JY Bluetooth Game Controller User Guide

WZUICOV B0CBSHN3JY Bluetooth Game Controller

Contents

Applicable to the following controller models

1. Red & Blue Game Controller

2. Red & Blue (Star) Game Controller

The following two blue working modes are universally connected to multiple devices and games

[R1 + Home] Enable Xbox controller mode

- Press and hold R1, then press the 'Home'
- Open the Bluetooth list to connect

After the connection is successful,

LED 1, 2, 3 are always on.

Recommended for:

- Gamers accustomed to Xbox controllers
- Android Phone /Tablet / TV /TV Box /Chromebook
- Windows PC /Laptop /Surface
- Tesla Model

[B + Home] Enable DualShock 4 Wireless Controller mode

- Press and hold B, then press the 'Home'
- Open the Bluetooth list to connect

After the connection is successful, LED 4 are always on.

Recommended for:

- Gamers accustomed to PS controllers
- iPad /iPad / Apple TV /Mac /MacBook
- PS Remote Play

The above are recommendations from test technicians.

However, these two Bluetooth modes are generally compatible with Android or iOS. You can choose freely if the game you want to play is also compatible with the controller type.

- The controller also supports wired and 2.4G wireless receivers
- The following list will introduce recommended connection methods

About firmware version

- The current firmware version is Ver 1.42

- Whether it is iOS or Android, it is recommended to install the app ShootingPlus V3 or ShootingPlus
- If you have usage problems and give feedback, even better suggestions can be provided

- When an update is released, the controller is connected to the mobile phone and the firmware can be updated using the APP.
- [A+ Home Enable Bluetooth for V3 Bluetooth Name: LJC-269

For iPhone / iPad / Mac / Apple TV (Bluetooth)

[B+ Home] Connect iPhone or iPad

- Press and hold B, then press the Home button
- At this time LED 4 flash

After the connection is successful,

LED 4 are always on.
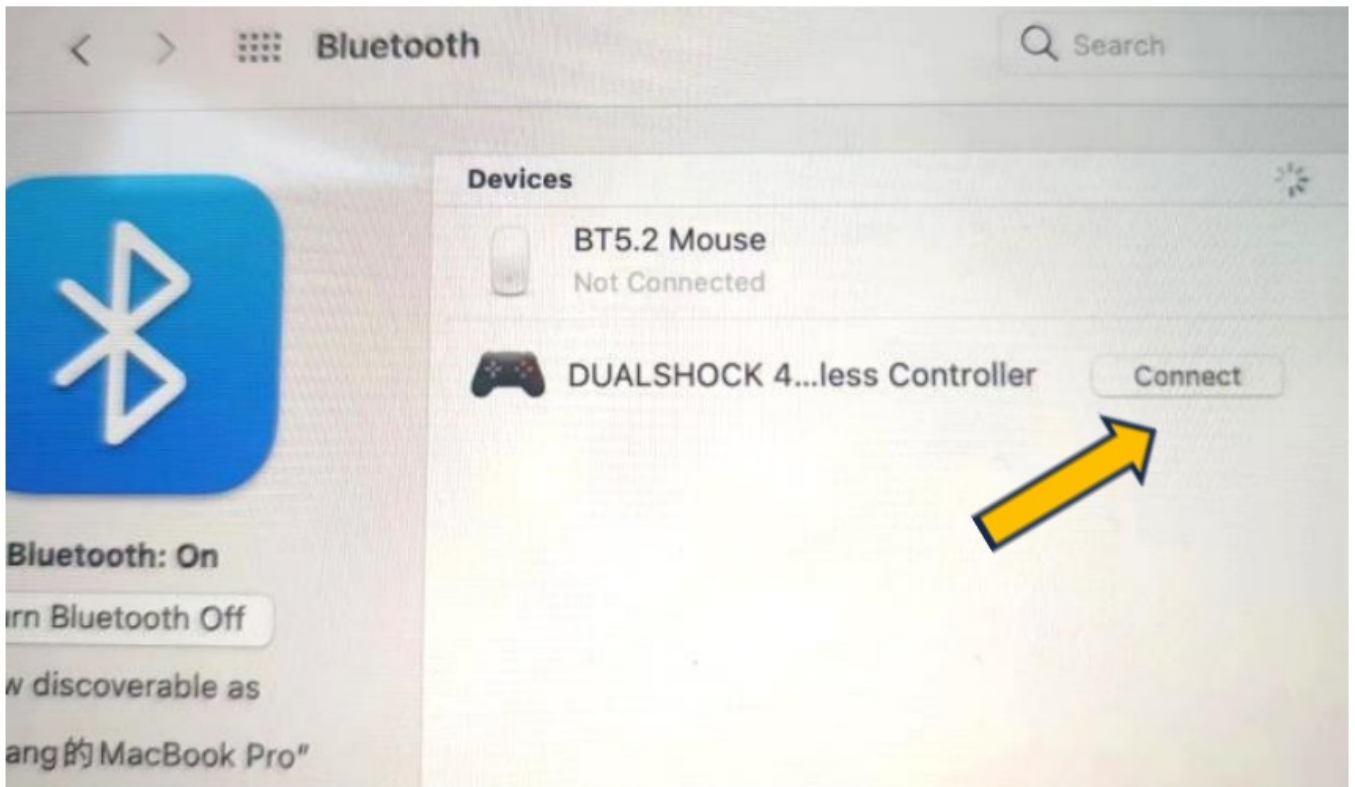

Open Bluetooth list

Settings → Bluetooth (on)

Bluetooth name: DualShock 4 **Wireless**Controller

- Compatible with popular games COD Mobile, Fortnite, Apex Mobile, Genshin Impact, Minecraft, Sky, etc.
- Compatible with MFi and Arcade games

  (it is recommended to confirm in advance whether the game is compatible with controllers)

[B+ Home] Connect to Mac/MacBook

[B+ Home] Connect to Apple TV

- **While using this mode, press the Home button to activate the menu and hibernate the Apple TV, and the controller will automatically turn off. When you need to wake up, press the Home button directly on the controller, which will wake up the Apple TV and automatically connect to the game controller.**
- If you are connected to the same iPhone and the Bluetooth connection is successful, long press Home for 3 seconds to turn off the controller.
- The next time you connect again, just press the Home button to turn on the game controller and it will automatically reconnect.
- If you have used a game controller to connect to different devices during the above process, you need to forget

the original Bluetooth name and press [B+ Home] again to connect.

For iPad or Mac/MacBook (USB -C wired

Only suitable for iPad or Mac/MacBook with USB port (including USB Type-C port)
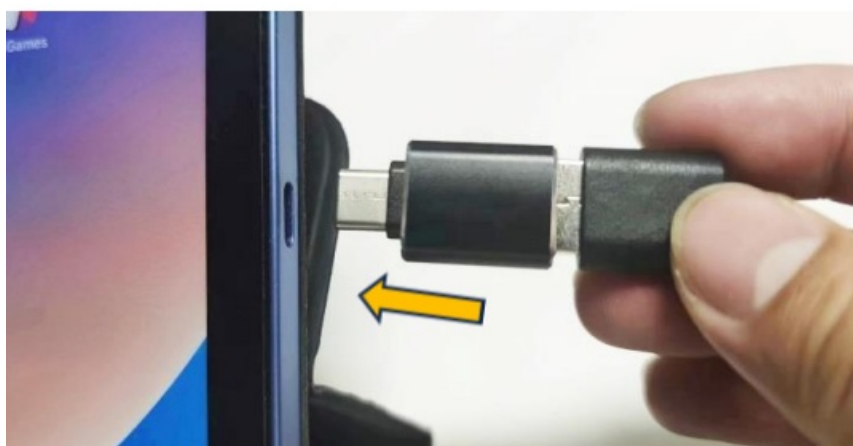

Package includes a USB A to C adapter

One USB C to A wired

Connect to iPad (Type-C)

USB adapter plugged into iPad

After the connection is successful, LED1 is always on

Connect to Mac (Type-C)

The controller catches B, then plugs in the wired

After the connection is successful, LED1 is always on

- iPad is different from Android Tablet, wired compatibility includes COD Mobile, Genshin Impact, etc.
- Wired use is faster than Bluetooth and has 0 latency

For Android Phone / Tablet / TV / TV Box (Bluetooth)

[R1 + Home] Enable Xbox controller mode

- Press and hold R1, then press the Home button
- At this time LED 1,2,3 flash

After the connection is successful,

LED1, 2, 3 is always on

Open Android Bluetooth list

Bluetooth name: Xbox Wireless Controller

- Supports Xbox game pass ultimate, GeForce Now, Steam Link, etc.
- Supports mainstream games including COD Mobile, BB Racing 2, Roblox, Minecraft, Among US, Dead Cells, GBA emulator, TMNT: Shredder's Revenge, Streets of Rage 4, Castle vania: Symphony of the Night.
- It is recommended to first read the app store game's introduction to compatible controllers.

Wired connection to Android, just plug it in directly

For Phone

For Tablet

- **Note:** The Android ver of COD Mobile currently only supports Bluetooth controller connection and does not support wired connections.

For Android Phone / Tablet / TV / TV Box (USB 2.4G Wireless)

**The product package includes a USB A to C adapter**

A 2.4G wireless receiver

Connect Android Phone

1. Plug the USB receiver into the USB adapter Then plug in Phone/Tablet/TV/TV Box

2. push Android Phone

Connect Android Tablet or TV Box

3. Or push Android Tablet

4. Or Push Android TV /TV Box

After plugging in the USB receiver,
**[L1 + Home] enables the controller and automatically connects**

- The 2.4G receiver is currently not compatible with the Android version of COD Mobile
- Also suitable for Tesla, PC Windows
- Currently not available for Switch, Xbox, iPad, Mac, iPhone15

For Switch (Bluetooth and wired)

[R2 + Home] Enable Bluetooth

Main interface – Controllers – Change Grip/Order

**How to wake up:**

1. After using the controller to hibernate Switch, press Home for more than 3 seconds to turn off the controller
2. The next time you want to use it, just press the Home button of the game controller to enable the controller and wake up the Switch at the same time.
3. **Note:** The device that the controller presses the Home button to reconnect or wake up will only be the last successfully connected device.

Switch port plugs into USB A-C adapter and wired

Hold down R2 on the controller and connect the Switch via wire

- Wired does not support Switch wake-up
- Wired does not require battery power
- the 'CLEAR' key will act as the FN function key

For Windows (Bluetooth, 2,4G Wireless, Wired)

[R1 + Home] Enable Xbox controller Bluetooth

Press and hold R1
R1
then press the Home button

Bluetooth name: Xbox Wireless Controller

[L1 + Home] Enable USB 2.4G wireless

* Wireless is successful:
LED1 is always on Unplug the data cable, then LED4 is always on.

About P4 & P5 connection

- No for P5 games, only for P4 games
- This is not a pro P4 game controller, no touchpad and headphone jack
- How to screenshot and share The 'Select' button on the controller is the share/capture button.

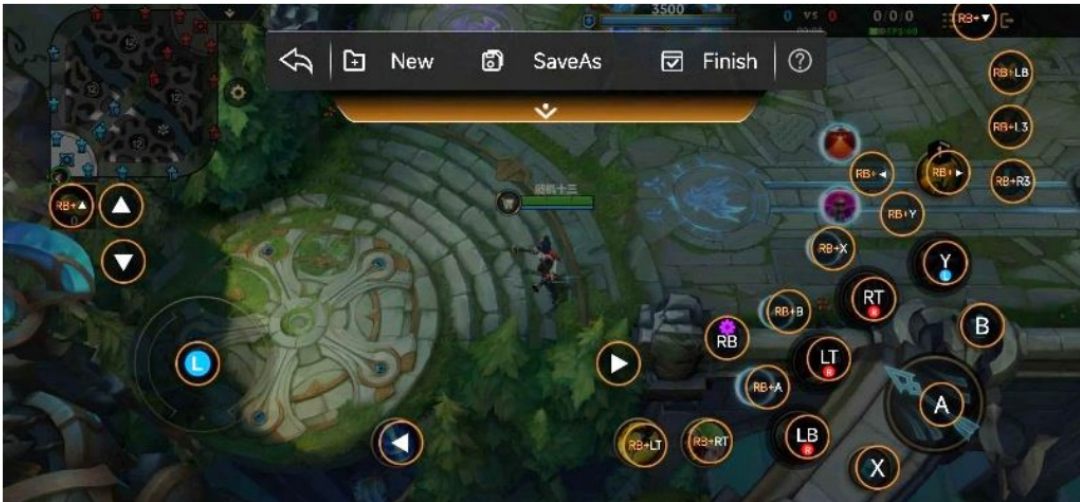

For V3 mapping mode

This mode is only available for some Android Phone & Tablet non-controller games, such as Arena of Valor, Wild Rift, Stumble Guys, World of Tanks, Mario Kart etc.

Can be found via Google Play

1. [A+Home] Enable Bluetooth mode connection
2. Open the APP and turn on the floating function

   Requires permissions to be enabled on Android phone or tablet
3. Open the game
4. Set mapping to click location
    - Customize virtual keys and remote sensing positions
    - Some games already have presets
5. Save and return, use the controller

   Bluetooth name: LJC-269

6. > [A+Home] Enable Bluetooth connection Bluetooth name: LJC-269

This is another version, but the operation is the same as above

Note:
Available for PUBG Mobile
But the settings will be more complicated
Therefore, it is generally recommended for some simple games.
Unless you are already very skilled

This is another third-party mapping tool

The advantage is that it only requires Bluetooth Xbox or PS4 controller connection

Play Android games with Gamepad/Controller, Mouse & Keyboard!

Map peripherals to touchscreen. No root or activator required
