## XEDGE RM520NGL Edge Controller

## Specifications

- **Product Name:** XEDGE Controller
- **User Guide Revision:** 1.27
- **Version:** 2.0
- **Release Date:** December 2024

## About this item

- Aim and move with precision by swapping in fresh stick modules\* so you're always playing with equipment that's in great shape. Plus, three types of changeable stick caps help you stay comfortable in-game without sacrificing grip or stability.
- Mappable back buttons The DualSense Edge wireless controller's two swappable sets of back buttons can be configured to any other button input, so you've always got game-changing actions and essential controls at your fingertips.
- Adjustable trigger lengths Manually set the travel distance of your left and right triggers for an optimal experience with whatever you're playing. Fast-paced FPS? Set a shorter travel distance to shoot faster on the field. Competitive racer? Set a longer travel distance for precise throttle control on the track.
- Remappable buttons Remap or even deactivate specific button inputs, so you can create a completely personalized control setup that's ideal for the game at hand.
- Quick-swap control profiles Once you've found your ideal control settings, you can

save them to unique profiles and swap between them on-the-fly, so your favourite configurations are always ready when you are.

## Product Description

Get an edge in gameplay by creating your own custom controls to fit your playstyle. Built with high performance and personalization in mind, the DualSense Edge™ wireless controller invites you to craft your own unique gaming experience so you can play your way. Ultra-Customizable Controls: Changeable stick caps, remappable inputs and

custom settings make your DualSense Edge™ wireless controller uniquely yours. Fine tune your aim by adjusting stick sensitivity and dead zones, set the travel distance of your triggers for faster inputs, and quickly swap between control profiles so you're always ready for your next game. Mappable Back Buttons: Swappable back buttons can be configured to any other button input, so you've always got game-changing actions and essential controls at your fingertips. Plus, with two different styles of button to choose from, you can pick an input type that feels just right for your playstyle.

DualSense™ Wireless Controller Features Built In: Enjoy all the immersive features of the DualSense™ wireless controller and our signature controller comfort. Experience varying force and tension at your fingertips with adaptive triggers and feel your in-game actions and environment simulated through haptic feedback. Replaceable Stick Modules: Play for longer with swappable replacement stick modules available to purchase separately. Haptic feedback and adaptive trigger features available when supported by game.

Perfect Your Gameplay™

### Ultra-customizable controls

- Custom settings make your DualSense Edge wireless controller uniquely yours.

Discover some of the controller's key features via the icons below:

Changeable stick caps

- Three types of changeable stick caps help you stay comfortable in-game without sacrificing grip or stability.

### **On-controller user interface**

- Quickly swap between your pre-set control profiles and adjust game volume\* and chatbalance\* from the controller's dedicated function button.
- \*Analogue audio connection to headset required for full compatibility.

### **Replaceable stick modules**

- Play for longer with swappable replacement stick modules available to purchase separately.

### **Adjustable trigger lengths**

- Manually set the travel distance of your left and right triggers for an optimal experience with whatever you're playing.

### **USB braided cable with lockable connector housing**

- Lock your USB in place so it's much less likely to slip out at a crucial moment.

## Mappable back buttons

- Two swappable sets of back buttons, configurable to any other button input, put essential controls at your fingertips.

## Made by PlayStation®

- **DualSense™ wireless controller features built in**
  - Experience all the immersive features of the DualSense wireless controller, including haptic feedback, adaptive triggers, a built-in microphone, motion controls and more in supported titles.

- **Signature comfort and slip-resistant inner grips**
  - Enjoy the same signature comfort of the original DualSense wireless controller, now enhanced with slip-resistant inner grips. Ideal for long sessions in single player games and staying comfortable during intense competitive play.

## Personalized control profiles

## Personalized control profiles

### Quick access profile settings menu

Simply press the Fn button and Options button while in game to open the customization menu, where you can quickly change your settings.

### Remappable buttons

Customize the control layout of your favorite games so the commands you need are always exactly where you want them to be. Save your button configurations to your player profile and switch between them without leaving your game.

### Adjustable triggers, stick sensitivity & vibration intensity

Configure your stick sensitivity, stick dead zones, and trigger dead zones for finely tuned inputs, and even set your vibration intensity for a completely customized play experience.

### Remappable buttons

Once you've found your ideal control settings, you can save them to unique profiles and swap between them on-the-fly, so your favourite configurations are always ready when you are.

## Keep everything together with the carrying case

- Keep your DualSense Edge wireless controller and its components together and organized in one spot with an included carrying case. You can even charge the controller via USB connection while it's stored in the case to make sure you're always ready for your next play session.

## Stick Module for DualSense Edge T™ Wireless Controller (sold separately)

- Maintain your DualSense Edge T™ wireless controller's great performance with this replacement stick module. Aim and move with precision by swapping in fresh stick modules so you're always playing with equipment that's in great shape.

## Product Usage Instructions

- **Global Configurations:**

1. **Ping the Server:**

- Ping the server using the ping button. If the button is green, ping is available. If the button is red, ping is unavailable.

## 2. **Edit Table Entries:**

- Edit the entries on the table by clicking on the Edit button and then clicking on the corresponding column where the change is to be made. After editing, click on Update to save the changes made to the server. A display message will notify the user of successful server addition.

## 3. **Delete a Server:**

- To delete a pre-configured server, select the box on the left of the corresponding server row and click the Delete button. A confirmation message will appear. Click Yes to confirm and delete the selected server.

## 4. **Upgrade Servers:**

- To upgrade servers, click on the Upgrade Servers menu option.

## 5. **Register a New Server:**

- Register a new server by clicking on the + button. Enter the details of the new server to be created, then click Save to add the server. A success message will confirm the addition of the new server.

## 6. **Delete Created Servers:**

- To delete the created servers, click on the box on the left side of the server URL on each row of the table. Then click Delete Selected. A confirmation message will appear. Click Yes to delete the selected server.

## • **Global Notifications:**

### ◦ **Visualizing Notifications:**

- This feature allows users to visualize all notifications raised and filter them based on different parameters.
- Navigate to Administration > Global Notifications Page.
- Select desired filters from the dropdown menus for Event, Severity, Serial Number, and Status to view specific notifications.

## **FAQs**

### • **Q: How can I check if ping is available for a server?**

- **A:** You can check ping availability by looking at the color of the ping button. Green indicates availability, while red indicates unavailability.

### • **Q: What should I do if I encounter an error while editing table entries?**

- **A:** If you encounter an error while editing, ensure all changes are correctly

inputted and try clicking on Update again.
