Initial Setup

Xencilabs Quick Keys

1. Download Drivers

To get the tablet's full benefits, we strongly recommend you download and install the driver.

The Quick Keys requires driver installation, however, the tablet will only have basic navigation functions without the driver.

Use the link below to access the Xencilabs downloads page for the latest drivers for Windows, Mac, and Linux.

2. Install Drivers

After your download is complete, run the driver installer, start the setup wizard, and begin using your new tablet.

Mac users should restart their computer after the software installation is complete for the driver to function correctly.

7. Connection Indicator

Blinking blue light indicates searching for connection, solid blue light indicates successful wireless connection, and breathing blue light when connected via USB cable.

8. Power Slide Switch

Slide and hold to turn on/off. Adjustable sleep times are in the settings panel.

9. Charging Indicator

A solid green light indicates full charge, a breathing green light indicates charging, and solid amber light indicates the device has a low charge.

10. OLED Display

Displays shortcut key assignments.

Connect Wirelessly

You can connect Quick Keys wirelessly with the provided dongle which establishes a wireless connection between the dongle and the tablet.
Additionally, we have provided a USB-A to USB-C adapter should you need it.
For added convenience, the single-provided dongle will connect both Quick Keys addition to a Xenselabs tablet.

Device Charging

Xencelabs Quick Keys

Charging Indicator

Solid Amber – Low Charge 🟡
Breathing Green – Charging 🟢
Solid Green – Fully Charged 🟢

To charge your Quick Keys connect it to a powered-on computer, powered USB hub, or another USB charger (5mAh required). To use your devices over a wireless connection, make sure they are sufficiently charged.

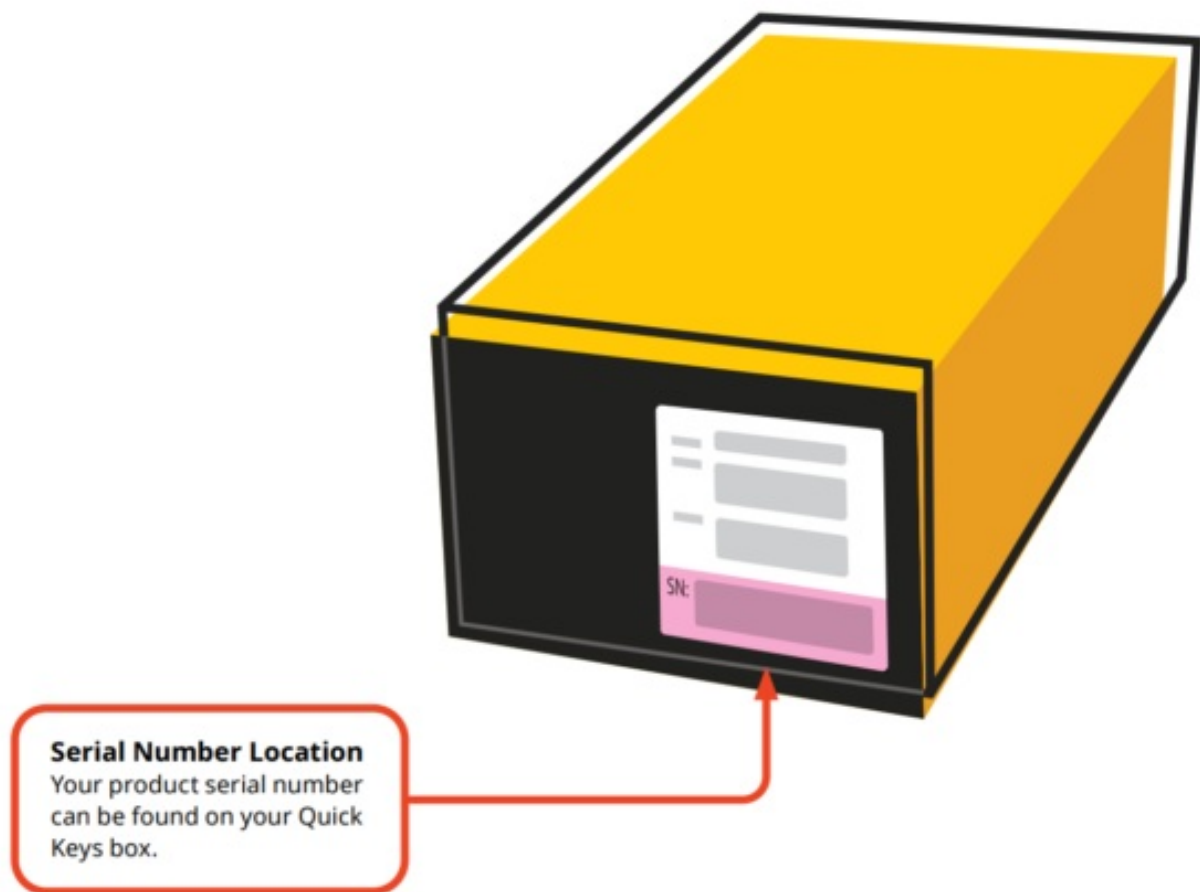

When fully charged, the Quick Keys will give you up to 52 hours of continuous use. When critically low the LED lights will turn amber, and a breathing green light indicates charging. See driver settings panel for charge status.
