XGIMI Firmware Updating from USB Disk

Necessary Components

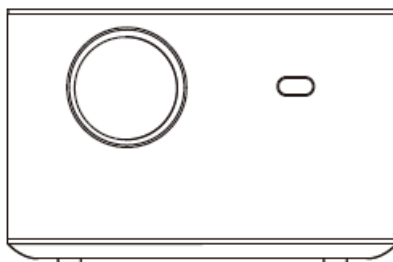

- USB disk (FAT32 Format)

- PC

- Projector (Models support firmware updates)

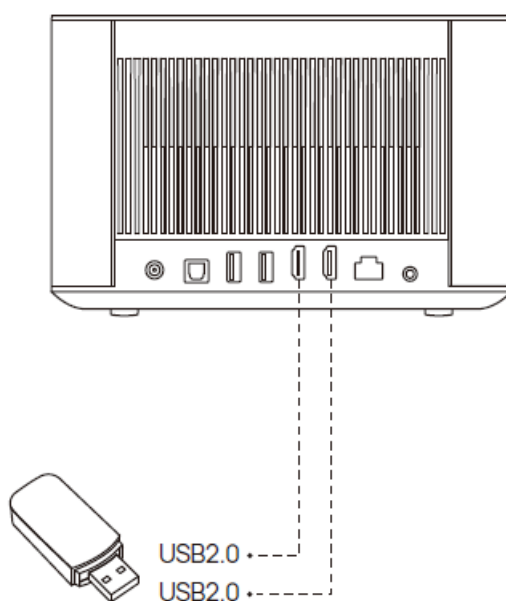

Update Steps

How to perform a force brush

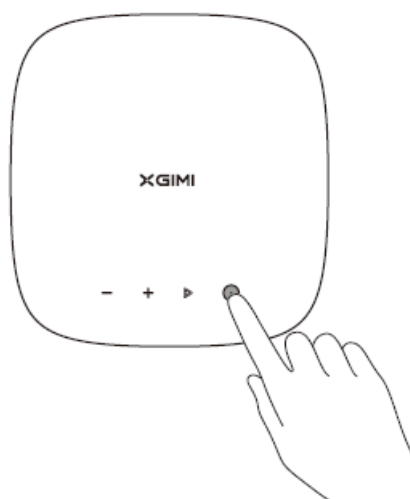

1. Download the firmware via the provided link from a PC and copy it to any USB disk; Note: (It should be formatted to FAT32)

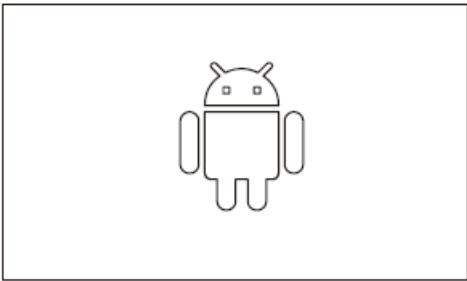

2. Plug the USB disk into the projector's USB 2.0 port;

3. With the projector in Off mode (please don't turn on the projector), long-press the "power" button on the projector for 5-7 seconds, and release it when you hear the fan operating strongly.

4. You'll see an Android robot and a progress bar; Then, the system will update automatically.
