xiaomi M47 4C Mi Router

Specifications:

- **Brand**: Mi
- **Model**: Router 4C
- **Color**: Black
- **Wireless Standard**: 802.11 b/g/n
- **Ports**: WAN, LAN
- **Power Supply**: DC 5V/1A

Product Usage Instructions

Step 1: Connect the Cables

1. Connect the power adapter to the router and plug it into a power source.
2. Connect the WAN port of the router to your DSL/Cable/Satellite modem using an Ethernet cable.
3. If your Internet network is connected via a network cable from the wall socket, connect it directly to the router's WAN port.

Step 2: Set Up the Network Connection

1. Turn on WLAN and connect to the Wi-Fi network named Xiaomi_XXXX (no password required).
2. Wait for the system indicator light to turn blue, then search for the Wi-Fi network on your device and connect.
3. Open a browser and go to **router.miwifi.com** or 192.168.31.1 to complete the configuration.
4. Enter the account name and password provided by your broadband provider and follow the on-screen instructions.
5. Set a new Wi-Fi name and password, and wait for the indicator light to stabilize before reconnecting to the Wi-Fi network.

I have finished setting up my network. Why can't I connect to the Internet?
Solution:

1. Ensure that your router is powered on and working correctly.

2. Connect your device to the router's Wi-Fi network and access **router.miwifi.com** to troubleshoot based on the diagnostics results.

**I've forgotten the administrator password for my router. What should I do?**
Solution: If you haven't set a specific password, try using your Wi-Fi password as the administrator password. If the issue persists, reset your router to factory settings and set up the network again.

How do I restore my router to the factory settings?
Solution:

1. Ensure the router is functioning properly.

2. Press and hold the Reset button at the base of the router for more than 5 seconds until the system status light turns orange.

3. Release the button and wait for the router to restart, indicating a successful reset.

Connect the cables

Power on the router, then connect the Internet (WAN) port to the DSL/Cable/satellite modem
*If your Internet network is connected by a network cable via the Internet wall socket, connect the cable directly to the router's WAN port
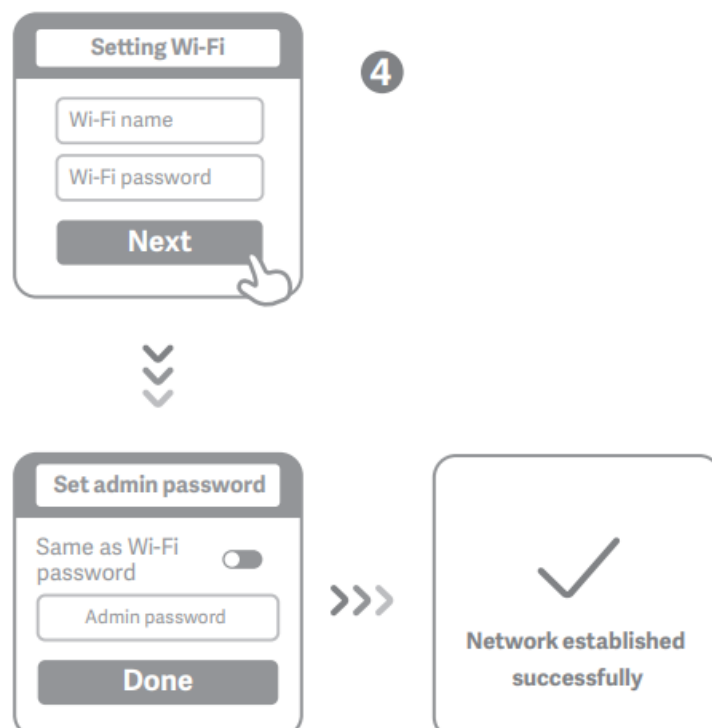

Set up the network connection

1. Connect to the Wi-Fi using a phone or computer(no password). Refer to the information on the bottom of the router for the Wi-Fi name

   Wait until the system indicator light ⏻ turns blue. Search for the Wi-Fi network and connect

2. Once the Wi-Fi is connected, you will be directed to the configuration page. If the configuration page is not present, open the browser and go to "**router.miwifi.com**" or "192.168.31.1" to complete the configuration Mi Router EULA is available at – **http://www1.miwifi.com/router/eula/20191230.html**

3. Enter the account name and password provided by your broadband provider, then click/tap Next (It depends on the Internet Service Provider you selected, whether your account name and password are required or not) If you have forgotten your broadband account name or password, please contact your broadband provider

4. Set a new Wi-Fi and administrator password. You can choose to use your Wi-Fi password as your administrator password as well

   Please wait until the indicator light turns blue and stops flashing, then reconnect to the Wi-Fi

Manage Mi WiFi

The web management website is **router.miwifi.com** and supports basic Internet functions Scan the QR code, download the Mi WiFi app, and manage your router anytime, anywhere

FAQ

I have finished setting up my network. Why can't I connect to the Internet?

1. **Step** 1: Use your phone to search for the Wi-Fi network set by your router. If you can't find it, make sure that the router is connected to the power and starts working normally

2. **Step** 2: Connect your phone to your router's Wi-Fi network, go to **router.miwifi.com**", and try to fix the problem based on the network diagnostics results

**I've forgotten the administrator password for my router. What should I do?**
If you haven't set a specific password, your administrator password will be the same as your Wi-Fi password, so try using this to log in. If the problem persists, it is recommended that you restore your router to the factory settings, then set up the network again

How do I restore my router to the factory settings?
First make sure that the router starts working normally, then hold down the Reset button at the base of the router for more than 5 seconds and let go when the system status light turns orange. When the router finishes restarting, the reset was successful

What do the different indicator lights mean on the router?
There should be two indicator lights on the front panel, which are the network status light (blue light) and the system status light (three colors: blue, orange, and purple)

System status light   Network status light

Light	Status	Explanation
Network Status Light		
Off	Nothing is plugged into the external Internet port or there is a problem with the connection.	
On	Network connection normal.	
Flashing	Sending or receiving data.	
System Status Light		
Off	Switched off or not connected to the power.	
Orange (Flashing)	System updating.	
Orange (On, not flashing)	System booting up.	
Blue (On, not flashing)	Functioning normally.	
Purple (Flashing)	Safe mode.	
Purple (On, not flashing)	System failure.
