Specifications

Technical Specifications

- Voltage: 3.6V
- Fresnel flashlight
- Professional, visual design
- Precise control of low and high frequency lights
- Main light: 1000 lm
- Maximum lighting range: 240 m
- The brightness of the main light is adjustable in high, medium and low levels
- Flashing /SOS/ warning
- For emergency situations in the car
- Seat belt cutter
- Design with open buckle that prevents accidental cuts
- Window breaker of the “ejection” type
- Press-type structure with hidden firing pin for safe crushing operation
- Flexible and unlimited zoom
- The lens grip can zoom in and out
- Function adjustment ring
- Rotatable for switching between two light sources
- Multifunctional side light
- Under white (to grey): Low frequency light
- Red light: Flashing
- Fog light: Flashing
- Water resistance level: IPX4
- Input Parameters: 5V/1.5A
- Long battery autonomy
- Battery type: Lithium
- Battery capacity: 3100 mAh
- Charging time: approximately 180 minutes
- Ultra long battery autonomy: 90 hours
- Two-color indicator clearly showing the remaining battery power
- Charging port: Type-C for greater compatibility

- Operating temperature: -15°C-45°C
- Magnetic fixation
- Rotatable to adjust the angle of illumination

General Specifications

- Darkness penetration and illumination of even remote areas becomes easy
- Responds to different lighting scenarios
- Allowing free adaptation between spotlight and headlight
- Smooth switching between low beam for night walks and high beam for searching
- Activate the main light to respond immediately to emergency situations
- The side light provides a flashing red/fog light to penetrate the fog and send an emergency signal
- Can be magnetically attached to cars, cases and other metal surfaces containing iron or nickel
- The rotating slide design allows the wide 107° rotation angle to be adjusted for more precise illumination
- The cutter can more easily cut the seat belt when used at a 45° angle
- For EMERGENCY NEED press the window breaker perpendicular to the glass and apply force
- Rotate the adjustment ring to easily switch between main light and side light mode
- Adjust the position of the ring with a knob for use in various situations
- Trapezoidal impact head
- High precision CNC machining
- Assistance for breaking windows

Important Notice

- Do not let children use the seat belt cutter and window breaker!

Included in the Box

- 1 Hand Strap
- 1 Charging Cable
- 1 User Manual

Weight & Dimensions

- Weight: 240 gr
- Dimensions: 4.5×3.6×18.8 cm

Documents / Resources

- Precise control of low and high-frequency lights
- Main light, 1200 lx
- Maximum lighting range: 240 m
- The brightness of the main light is adjustable in high, medium and low levels
- Testing RSCC warning
- For emergency situations in the car
- Seat belt cutter
- Design with open buckle that prevents accidental cuts
