- 8 Documents / Resources
 - 8.1 References

Client downloading

Please scan the lower (right) QR code, download and install the "v720" app, or search for "V720" in the mobile phone application store to download and install.

Product icon

Adding Device

WiFi Mode

1. Open the "V720" APP and allow the APP to use all permissions.

2. According to the guidance in the figure below, short press the "ON" power-on button, wait for the blue indicator to light up and then long press the "MODE" network key to reset the device blue indicator light flashes rapidly.

3. The APP interface will display “Device awaiting addition”. Select “Add Device” and follow the prompts to bind the device. (If this message does not appear, click on the “+” in the upper right corner and follow the prompted steps).

4. Device network: select or enter a 2.4G band WIFI account and fill in the password, click “Next”, make sure it is correct and then bind the device.

Note: 5G Wi-Fi of dual channel router usually has “-5g” mark after the name. Remember NOT to select this Wi-Fi for device binding.

For example :

AP Mode

1. Open the “V720” APP and allow the APP to use all permissions.

2. According to the guidance in the figure below, short press the “ON” power-on button, wait for the blue indicator to light up and then long press the “MODE” network key to reset the device blue indicator light flashes rapidly.

3. Mobile phone turn on the WIFI and connect to the WIFI hotspot starting with “NAX_”.

4. Return to the “v720” app and refresh dropdownlist, when the device displays that means the short-range mode connection is successful.

SD card recording instructions

SD card recording requires the purchase of SD card insertion, only supports FAT32 format SD card, the maximum capacity of 128G. recognizes the card and automatically records, automatically overwrites the original video and cyclic recording after the storage is full.

Common Questions and Precautions

1. The device only supports 2.4G networks. (When configuring the network, please do not choose the 5G network. Generally, 5G WiFi network names contain the “5G” designation).
2. Device sharing: The device can be shared with multiple users.
3. In AP mode, remote monitoring is not possible. Each time you view the monitor, the mobile phone needs to be approximately 3 meters from the camera. Connect to the WiFi beginning with 'Nax', then return to the APP to watch. The inability to access the internet while your phone is connected to the camera's WiFi is normal. Disconnecting the WiFi connection will resolve this.
4. The applicable working temperature of this product is -20°C ~50°C. Please do not use this product in an environment where the temperature is too high or too low.
5. This product is a precision electronic product. Please do not use the product in an environment where it is excessively wet or may cause this water to enter the product.
6. To better use this product, please avoid the front and side of the lens close to the glass, white wall and other reflective objects, in order to avoid the picture is bright near and dark in the distance or whitish.

7. Please ensure that this product is installed within the range of Wi-Fi signal coverage, and placed as far as possible in a location with better Wi-Fi signal, and try to install it far away from the microwave oven or other locations that may affect the signal.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
