Product Usage Instructions

Installation of Wireless Moon Sensor

1. Install the arm to the bracket.
2. Install the bracket in the desired location.
3. Install the base.
4. Adjust the angle as desired.

Download and Install the Xodo Smart App

Download and install the Xodo Smart App from the App Store (for iOS) or Google Play Store (for Android). You can search for "XODO Smart by Conxo Inc." to find the app. Open the app and follow the on-screen prompts to login or register a profile. If you don't have an existing account, you can register by entering your email address and setting up a profile.

Adding PS2

To add the PS2 Wireless Moon Sensor to the app:

1. Turn on your PS2 Wireless Moon Sensor.
2. Select SA2 in the app.
3. Click on "Accessories" in the app.
4. In the Accessories page, click "Quick add" and move in front of the PS2 Wireless Moon Sensor.
5. The SA2 Smart Alarm Gateway will make a prompt. Click "Confirm" to complete the setup.
6. Your PS2 Wireless Moon Sensor is now ready to work. Note that it can only work with XODO SA2 Smart Alarm Gateway.

Wireless Moon Sensor Home Screen
The home screen of the app will display the live status of the Wireless Moon Sensor. You can press the "Click to view more" button to view the alarm history, and press the button to set the Wireless Moon Sensor alarm mode.

Configure the Wireless Moon Sensor Settings
You can configure different settings for the Wireless Moon Sensor from the menu button on the upper right-hand side of the app:

1. Device Name: Change the name of the device as desired.
2. Device Information: Check the information of the Wireless Moon Sensor.
3. Tap-to-Run and Automation: Check the Smart Automation settings linked with your device.
4. Supported Third-Party Control: Get information on how to connect your device to Amazon Alexa.
5. Add Members: Allow other users to control the device in the Share Device settings.
6. FAQ & Feedback: Report issues and get help.
7. Add to Home Screen: Add the Wireless Moon Sensor to the home screen of your smartphone.
8. Remove Device: Remove the Wireless Moon Sensor from the Xodo Smart app and remove pairing. This is necessary if pairing with a new device.
9. Restore Factory Defaults: Reset the Wireless Moon Sensor to factory settings.
