A Guide to Wall Mounting & Fixings

- If plastic wall plugs are supplied

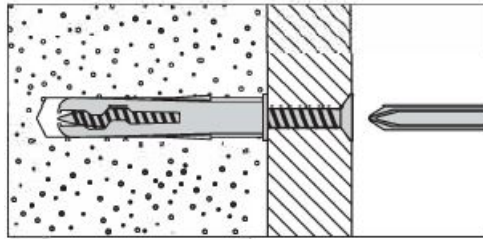

- These are only suitable for use in masonry walls
- If you are in any doubt about
- The correct wall plugs for
- Your wall, seek professional assistance.

Important: When drilling into walls always Check that there are no hidden wires or pipes. Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a professional assistance if you are unsure. ALL HOME FITTINGS ARE PERFORMED AT THE USERS OWN RISK. PLEASE CONSULT PROFESSIONAL ASSISTANCE IF NEEDED.

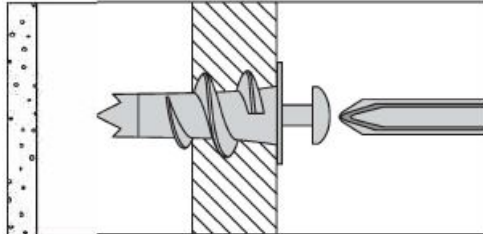

TYPES OF WALLS

- **No. 1** “General Purpose” wall plug

- Generally, aerated blocks should not be used to support heavy loads, use specialist fitting in this case.
For light loads, general purpose wall plugs can be used.

- **No.2 “Plasterboard” wall plug**

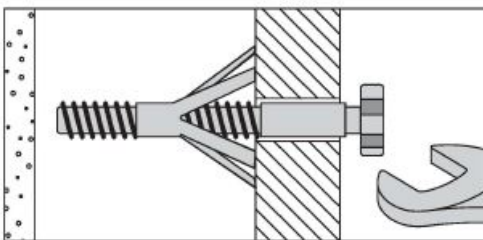

- For use when attaching light loads on to plasterboard partitions.

- **No.3 “Cavity Fixing” wall plug 1For use with plasterboard partitions or hollow wooden doors.No.5 “Hammer Fixing” wall plug**

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

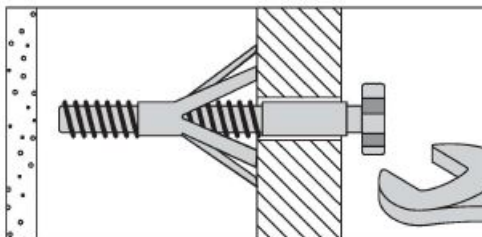

No.6 “Shield Anchor” wall plug Heavy load

64

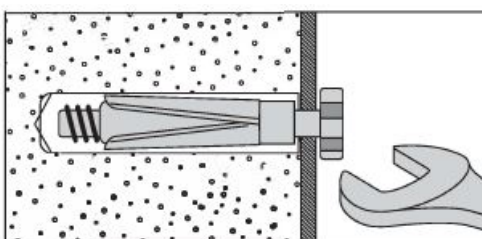

- **No.4 “Cavity Fixing-Heavy Duty” wall plug**

- For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

- **No.5 “Hammer Fixing” wall plug**

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall. No.6 “Shield Anchor” wall plug Heavy loads

- **No.4 “Cavity Fixing-Heavy Duty” wall plug**

- For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.No.3 “Cavity Fixing” wall plug For use with plasterboard partitions or hollow wooden doors. No.4 “Cavity Fixing-Heavy Duty” wall plug For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.
