Key Features and Benefits

Native Microsoft Teams-tailored user interface, smooth conference experience
Native Microsoft Teams-tailored user interface offers a one-touch meeting join. Designed with the idea of multi-function all-in-one, the MTouch II touch panel allows you easily perform call control, camera control, content sharing, and other functions. At the same time, MTouchû has a built-in Human Motion Sensor that the conference system can automatically waken up and you can immediately start the conference.

Multi-camera solution, support camera layout
Yealink Camera-Hub can be used with multiple UVC80s to provide a multi-camera solution with the feature of the camera, and users can flexibly switch the camera layouts as needed. The UVC80 camera supports 1080P / 60-frame video calls and is equipped with 12x optical zoom to provide clear and lossless video images.

Content sharing in real-time
The unique wireless content sharing solution provides participants with maximum flexibility, that a one-click content sharing can be simply realized by plugging into the WPP20 only. With a high resolution of 1080P / 30 frames, it provides users with a better content-sharing experience. Besides, the wired content sharing is also available by connecting to the USB-C port or HDMI port.

Simple to deploy, easy to use
With the VCH port, MCore is specially designed for the video meeting rooms that the deployment can be easily extended. At the same time, its all-in-one design with the feature of cable management ensures the stability of the wired connection, and the most appropriate deployment can be achieved according to the layout of the meeting room. One CAT5e is totally enough to connect the TV area and the conference table area and to complete the data transmission and power supply, no additional power supply or extension cable is needed, which not only simplifying the deployment but also effectively reducing deployment costs.

Manage your devices remotely
This solution supports Yealink Device Management Platform/Cloud Service, you can flawlessly manage, monitor, configure, update and diagnose all Yealink audio and video device peripherals on this platform remotely.

Connection

💡 Do not connect the switch to the Internet, otherwise, it will cause network abnormalities.

💡 The switch and ethernet cables should be purchased separately.

💡 When starting up the system for the first time, you need to connect a mouse to complete the initial configuration. We recommend using the wireless mouse and keyboard kit.

💡 For more information about the installation and deployment of accessories (for example, the installation of MCore package or the camera-hub), refer to the Quick Start Guide of the corresponding accessory.
