# How to Add Yeewise Cameras to Alexa Echo Show?

1. On your phone, download and install Wall Pixel HD App. Create an account and add your Yeewise device to the app following the quick user guide. (Skip this if you've finished these steps.)
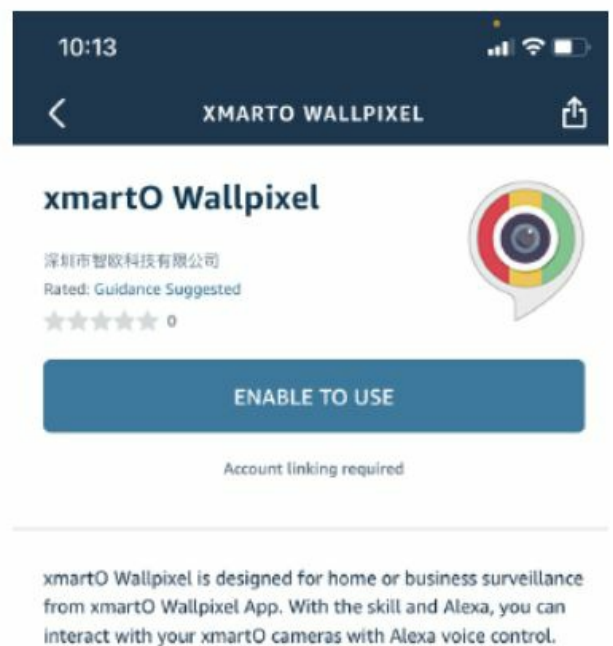

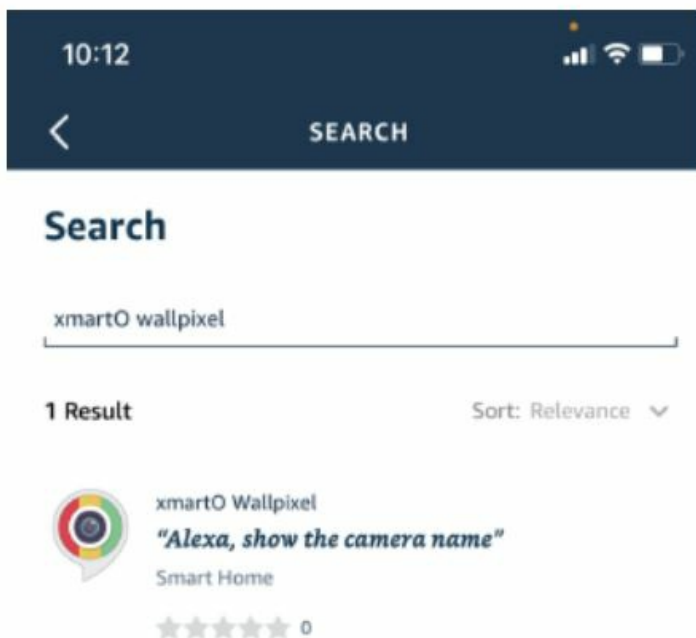

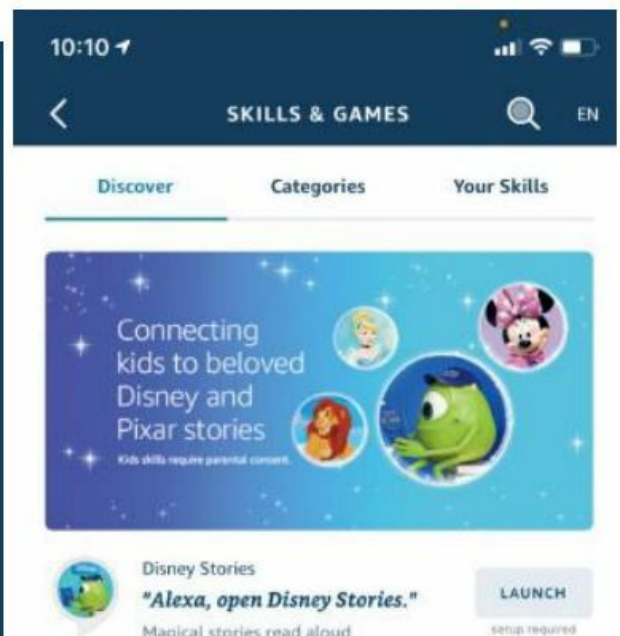

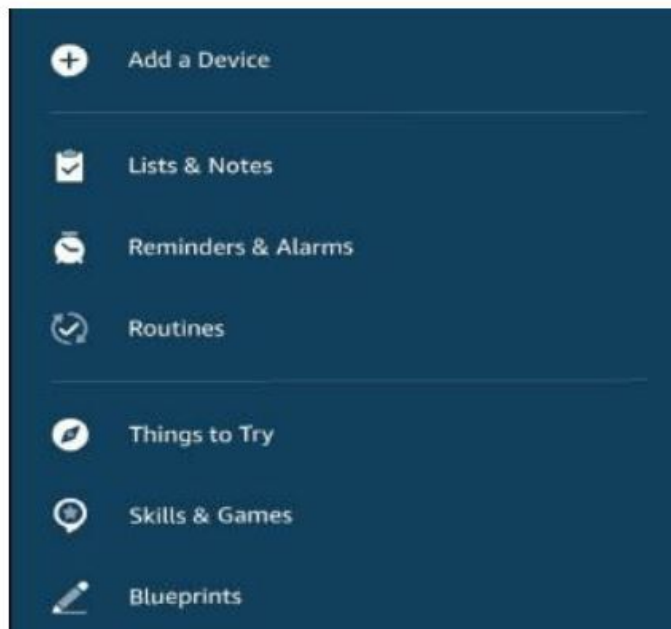

2. After adding the device in your app, please go to Device Setting and enable the Alexa function.
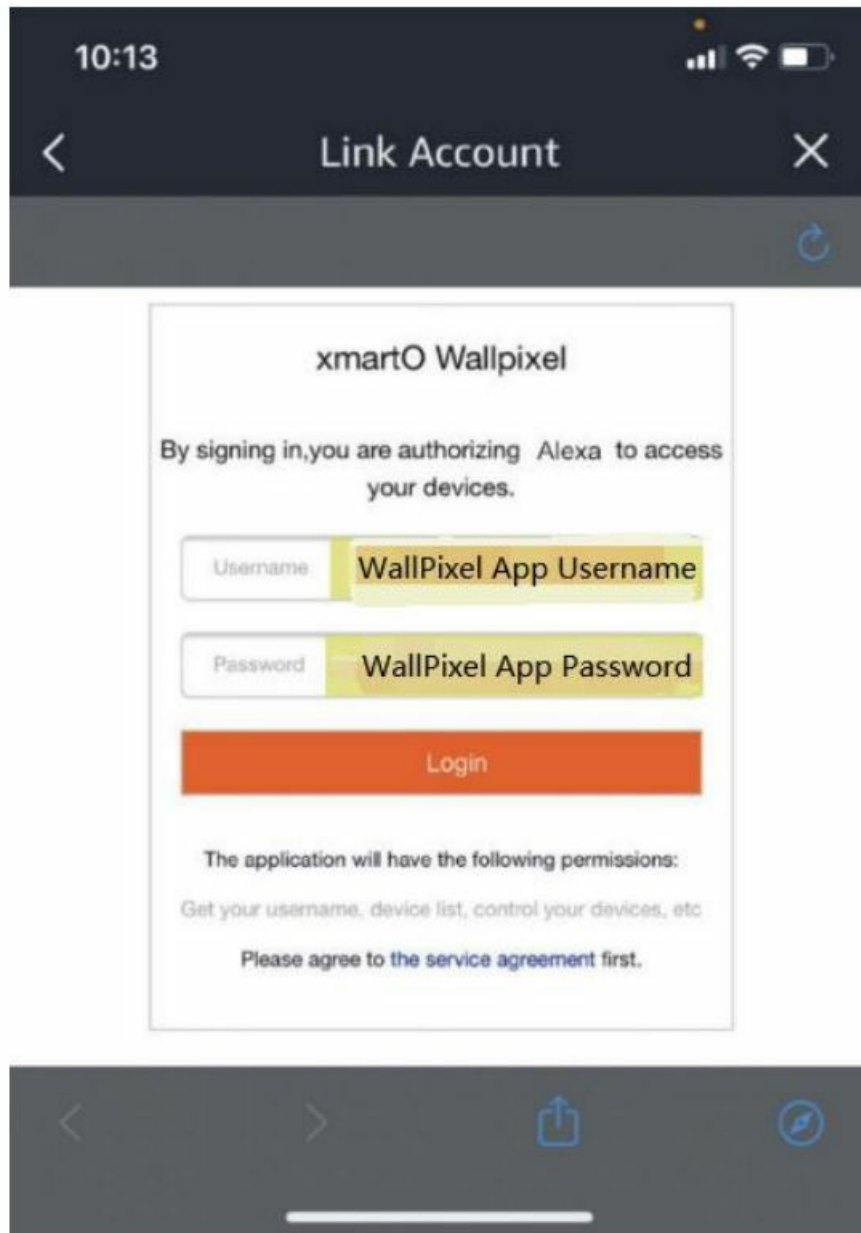

For camera systems, you need to enable Alexa in NVR also. Please right click the NVR mouse, then click System Setting Network Setting Network Service, turn on Alexa here.

Network Setting

Enable RTSP, Alexa and other network services

| Connect to router (wired) | Connect to router (wireless) | NVR Wi-Fi Hotspot | Camera WiFi Relay | Network Service |

RTSP Server

With this switched ON, the code stream can be obtained through the address rtsp://admin:@192.168.1.114:80/chN_M.264, where N is the channel number minus one. When M equals to 0, it is the main code stream; when M equals to 1, it is the sub code stream.

Alexa

With this switched ON, you can view video through Alexa Echo Show

3. On your phone, download and install the Amazon Alexa App, create an Alexa user account. (Skip this step if you've done this before.)

4. In Alexa App, go to Skills & Games, search Wall Pixel to find the xmartO Wall Pixel Skill. Enable the skill.

5. Link Account. After enable the skill, the Alexa app will ask you to link account. Enter your Wall Pixel App username and password to login.
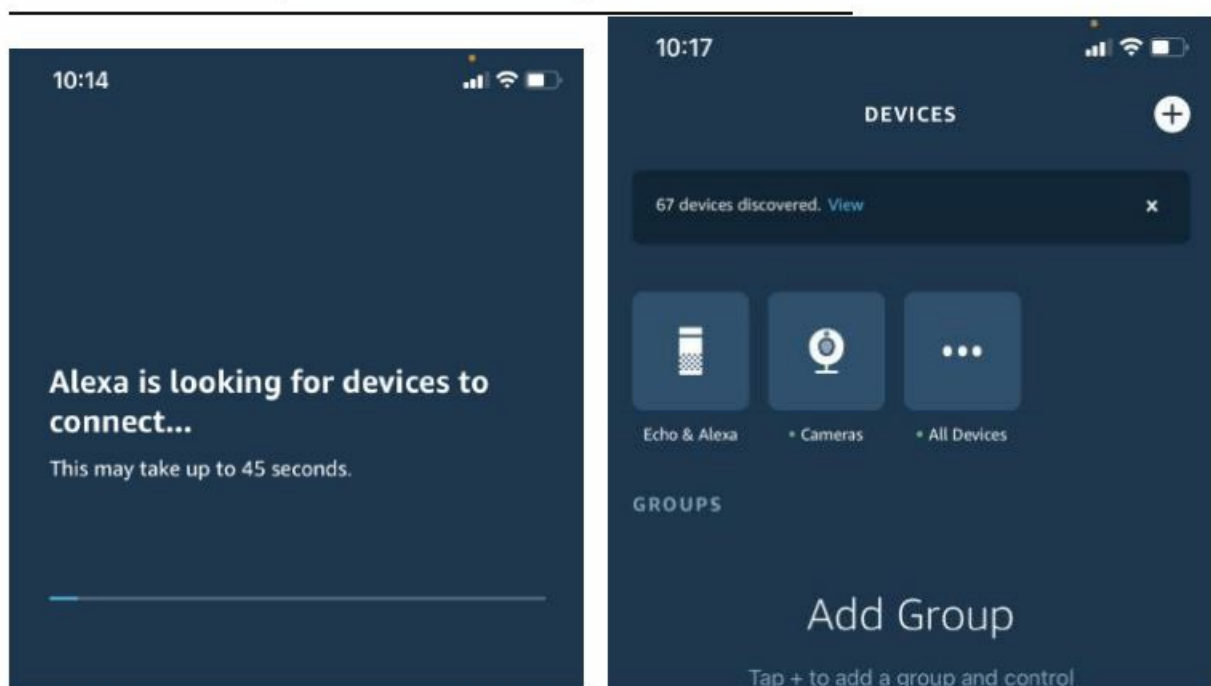

6. Discover Devices. Tap "DISCOVER DEVICES", the Alexa App will look for and import devices from Wall Pixel App.

It will take the existed device names such as "Porch camera", "Device 1", etc. If your Yee wise device is a multiple channel NVR system, please rename each channel in the Alexa App.

Discover Devices

Smart Home devices must be discovered before they can be used with Alexa.

CANCEL

DISCOVER DEVICES

10:14

Alexa is looking for devices to connect...

This may take up to 45 seconds.

10:17

DEVICES

67 devices discovered. View

Echo & Alexa   • Cameras   • All Devices

GROUPS

Add Group

Tap + to add a group and control

7. Now you can command your Echo Show to show you the camera.

"Alexa, show me the porch camera"

"Alexa, show me the back yard camera"

"Alexa, show me the device 1"

Note: Echo show does not support H.265 streams at this moment, it will display the camera's sub-stream. In future, when Echo show has H.265 capability, it will display main-stream. For cameras with H.265 stream only, the Echo show may not be able to display the image properly.
