Highlights

This Android 13 GMS release 13-11-22.00-TG-U05-STD-NEM-04 covers the MC9400 family of products. Starting at Android 13, Delta Updates must be installed in sequential order (ascending oldest to newest); Update Package List (UPL) is no longer a supported method. In place of installing multiple sequential Deltas, a Full Update can be used to jump to any available LifeGuard Update.

Life Guard patches are sequential and include all previous fixes that are part of earlier patch releases.

Please see device compatibility under the Addendum section for more details.
