Packaging List

- ① Printer*1

- ② Product Instruction*1

- ③ Data Cable*1

Device Parameter

Product name	Smart Mini Label Maker
Product model	D3OS
Printing technology	Thermal printing
Effective printing width	0.47 inch (12mm)
Supported consumables	Continuous paper / Interstitial paper / Black label paper
Printing density	Light, standard, dark
Printing resolution	203dpi
Print head service life	50KM
Communication interface	Bluetooth
Product size	5.2.3.2"1.3inch(133.5*80.5*33.5mm)
Power input	5V-2A
Power supply method	Micro USB
	Lithium battery
Supported operating system	Android
	iOS

Component Instruction

1. Appearance Introduction

2. Functions of the power button

Operation method	Functions
Press and hold 2S	Turn on/off
Click	Print out the paper
Double click	Print the content of the self-test paper

3. Power indicator status

1. Our warranty provides "Exchange/Return" services within one year of purchase.
2. Please keep the warranty card in a safe location for future reference.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Warranty / Maintenance Card

- Replace
- Return
- Repair
