Zigbee

Zigbee XZ-SR-DR01 Door and Window Sensor

Specifications:

- **Name:** Zigbee Door/Window Sensor
- **Battery Type:** CR2032
- **Working Temperature:** -10~55°C
- **Working Humidity:** 10%-90% RH (No Condensation)
- **Wireless Connection:** Zigbee 3.0

Product Usage Instructions

Connect Preparation:

Ensure that the product is within effective coverage of the smart host (Gateway) Zigbee network. Make sure the gateway is added.

Download APP:

Search the app store for related APP or scan the two-dimension code on the outer packing to download and install it. Register an account if it's your first time or log in if you already have an account.

Network Settings:

1. Power on the device and ensure your phone is connected to the network and the smart gateway is added.
2. In the TUYA app, click Add Device and select Door/Window Sensor.
3. Press and hold the reset button for more than 5s until the network indicator flashes.
4. Follow the APP instructions to add the device. Once added, it will appear in My Home list.

Packing List:

- Door/Window Sensor *1
- Back Gum Paste *1
- Battery *1
- Reset Needle *1
- Product user manual *1

Please read the user manual carefully before using the product.

FAQ:

1. Q: What battery type does the Zigbee Door/Window Sensor use?

A: The sensor uses a CR2032 battery.

2. Q: How do I ensure effective connectivity with the smart host (Gateway) Zigbee network?

A: Make sure the product is within the coverage area of the Zigbee network and that the gateway is properly added.

3. Q: How can I add the Door/Window Sensor to the TUYA app?

A: Power on the device, open the TUYA app, click Add Device, select Door/Window Sensor, and follow the instructions provided in the app.

Introduction

The door/window sensor detects the opening or closing of doors /Windows, combined with other equipment to achieve intelligent application scenes.

Make sure the door magnetic widget is on the side of the alignment sign

Specification

Name	Zigbee Door/Window Sensor
Battery Type	CR2032
Working Temperature	-10°C~55°C
Working Humidity 10%-90%RH No Condensation

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
