Inserting SD card to the B4 camera

- Unscrewing SD card flap.
1. Place the camera in reverse to see SD card flap.
 2. Unscrew two screws as seen in the picture.
 3. Remove flap (you will see a view like on the second picture).

- Proper SD card insertion

1. Put SD card on a side with golden pins pointed towards you as seen on picture number 3.

2. With this card position put it inside the SD slot.
3. When card is inserted properly it would 'click'.
4. Properly inserted card could be seen on picture number 4.
