**ZIOCOM**

**ZIOCOM G08 Ground Loop Isolator**

## PRODUCT INFORMATION

**Function:** Eliminate the noise and buzz generated by ground loops, allowing you to enjoy purer music.

**Application field:** It is mainly used for HI-Fi audio, car audio, campus broadcasting, recording studio, TV, computer, DVD and other RCA interface devices, which can eliminate the problem of making noise caused by ground loops.

### How to use

- Connect the audio source output to the RCA male or RCA female of the product, and then connect the other end of the product to the audio input port of the amplifier or other equipment, and you can play music after the connection is completed.
- Both the RCA male or the RCA female can be used as the input, and the other end can be used as the output.

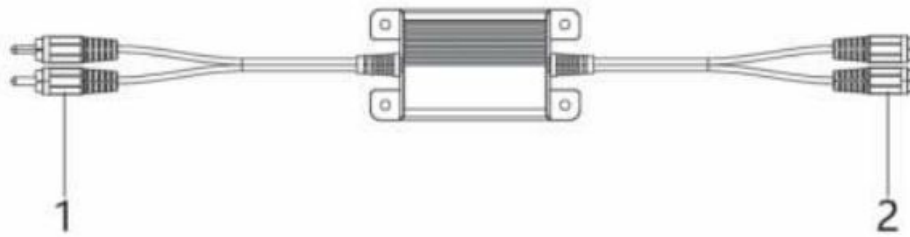

### Package

1. 1 X Group Loop Isolator
2. 1 x User Manual

### Illustrate

1. RCA male
2. RCA female

**Note:** This product can only eliminate the noise caused by ground loops, cannot eliminate electromagnetic interference, and the sound source or amplifier's own noise.
