ZYXEL ZyWALL USG FLEX Series Network Security Firewall

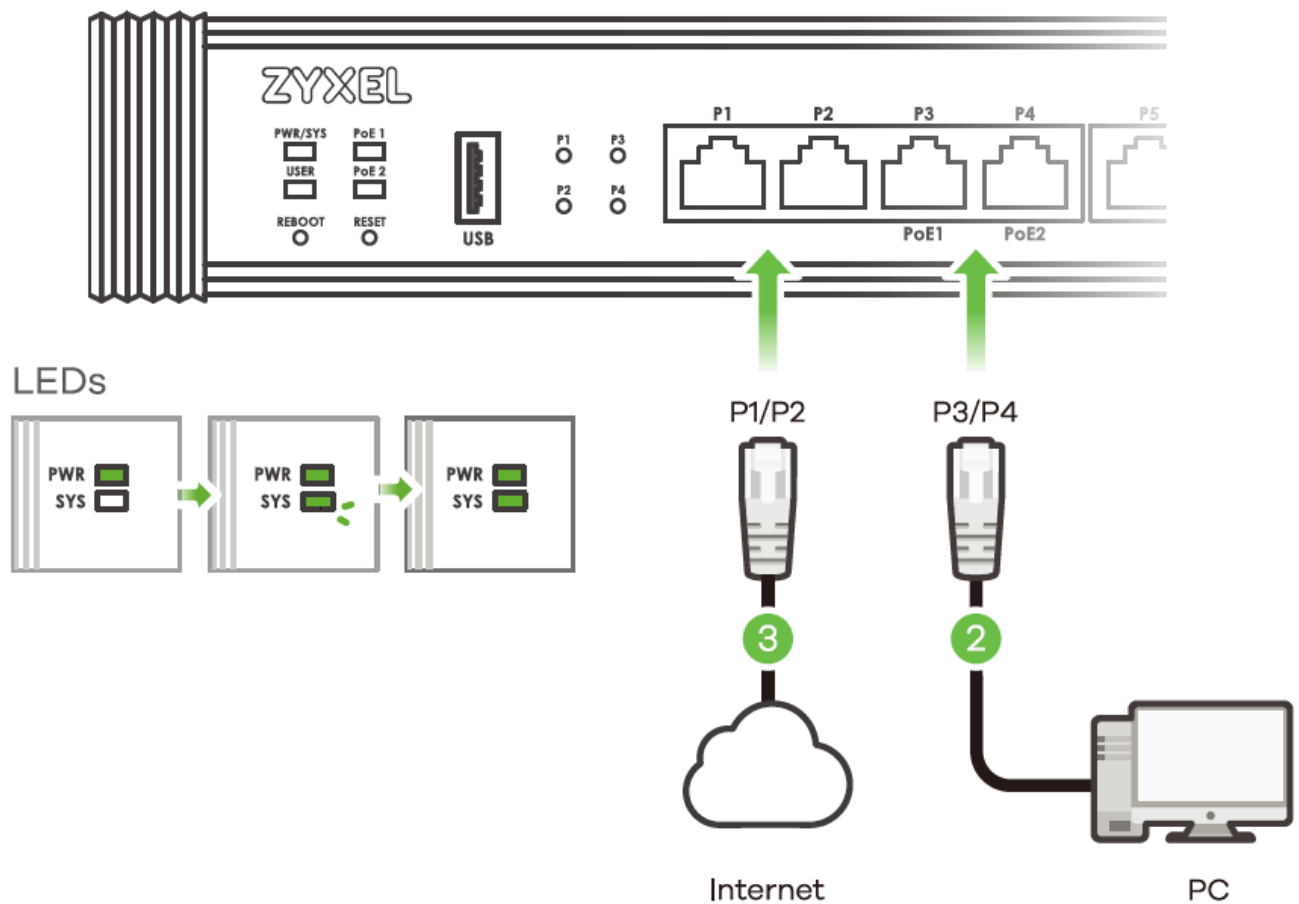

Hardware Installation

[Back](#)

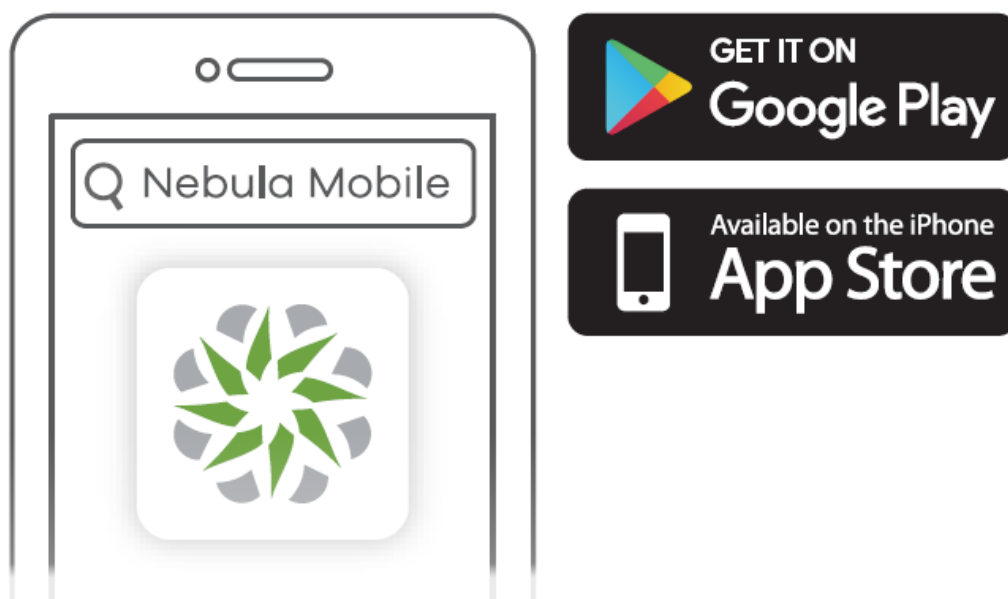

Front

1. Use the included power adaptor or power cord to connect the power socket (on the rear panel) to a power outlet.
2. It is recommended that you configure the Security Appliance before using it to protect your network. Use an Ethernet cable to connect a computer to the LAN port (P3 or P4) of the Security Appliance.
3. Use another Ethernet cable(s) to connect the WAN port (P1 or P2) to an Ethernet jack with Internet access. Look at the front panel. The PWR light turns on. The SYS light blinks during system testing and initialization and then stays on when the system is ready.

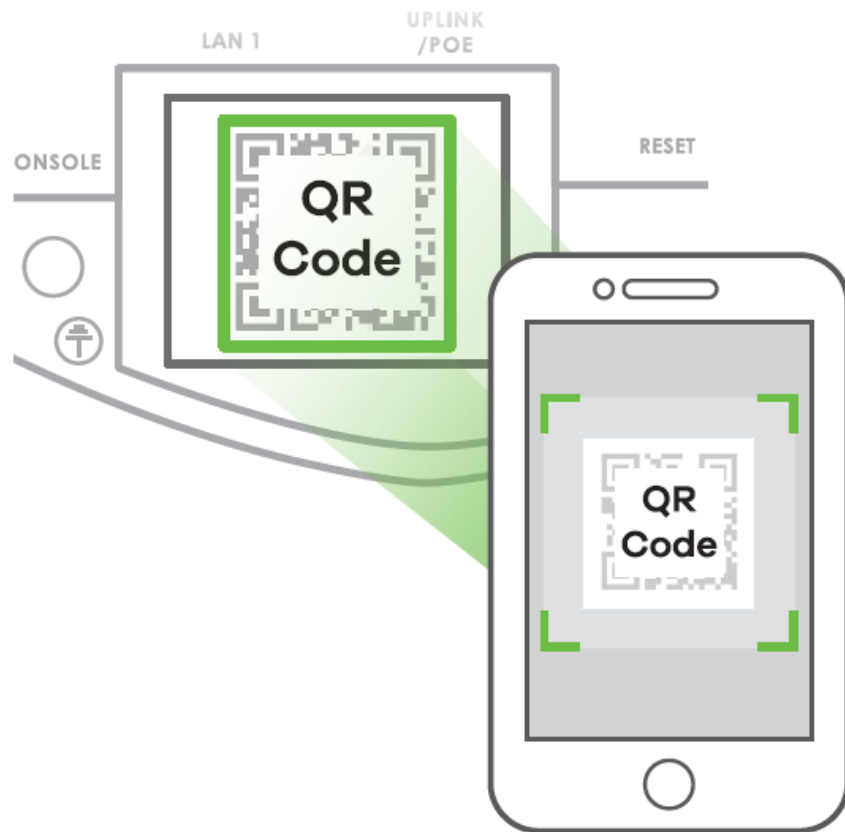

Option 1 Nebula Registration with the App

Use the Zyxel Nebula Mobile app to register a Zyxel Security Appliance with Nebula if your device uses a dynamic IP address. If your device uses a static IP address or PPPoE, use Option 2, log in, then run the wizard and configure the WAN.

Where to find QR code:

Label on the device

Download and open the Zyxel Nebula Mobile app. Log in with your Zyxel Account. Create an organization and site or select an existing site. Scan the Security Appliance's QR code to add it to the site.

Option 2 Direct Management

Use this method if you want to manage the Security Appliance directly using your web browser. Log in, then run the wizard

USG FLEX H Series: <https://192.168.168.1>

User Name: admin

Login Password: See Zyxel Device label or 1234

Enter User Name/Password and click to login.

Login

We are enhancing security by introducing unique passwords. If your device has a password printed on the back label, please use it. Otherwise, enter 1234.

Launch your web browser and go to <https://192.168.168.1> for Security Appliance. Click Yes to proceed if you get a security alert or certificate screen. Enter the user name and password. Click Login.
